Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

Open article

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM
Prediction of Liver disease

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

DIYA RAJIV

Collection of blood test reports
Collection of the other relevant data
Representing data in a sheet
Preprocess/clean the data

AFRIN BANU LS

Splitting the dataset
Arranging the collected samples based on risk priority
Splitting the data based on sex, age
Splitting the data set and determining accordingly

ANUSHOBICA P

Storing the collected sample data on cloud
Splitting the dataset as training set and testing set
Training set was applied to fit the parameters.
Part of training set was used for testing

GNANESHWARAN S

Visualizing the data by plotting the inputs
Statistically plotting the data based on test samples
Analyzing the data
Analyzing the test results for early treatment
Analyzing the test results for intermediate or advanced level treatment

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

Collection

Collection of blood test reports
Collection of the other relevant data
Representing the data on data sheet
Arranging the collected samples on the data sheet

Dataset Updation

Splitting the dataset based on cause
Arranging the collected samples based on risk priority
Categorizing the data based on sex, age
Splitting the data set and determining accordingly

Dataset process

Storing the collected data on cloud
Splitting the dataset as trained and testing set
Training set was applied to fit the parameters.
Part of training set was used for testing

Data analyzing

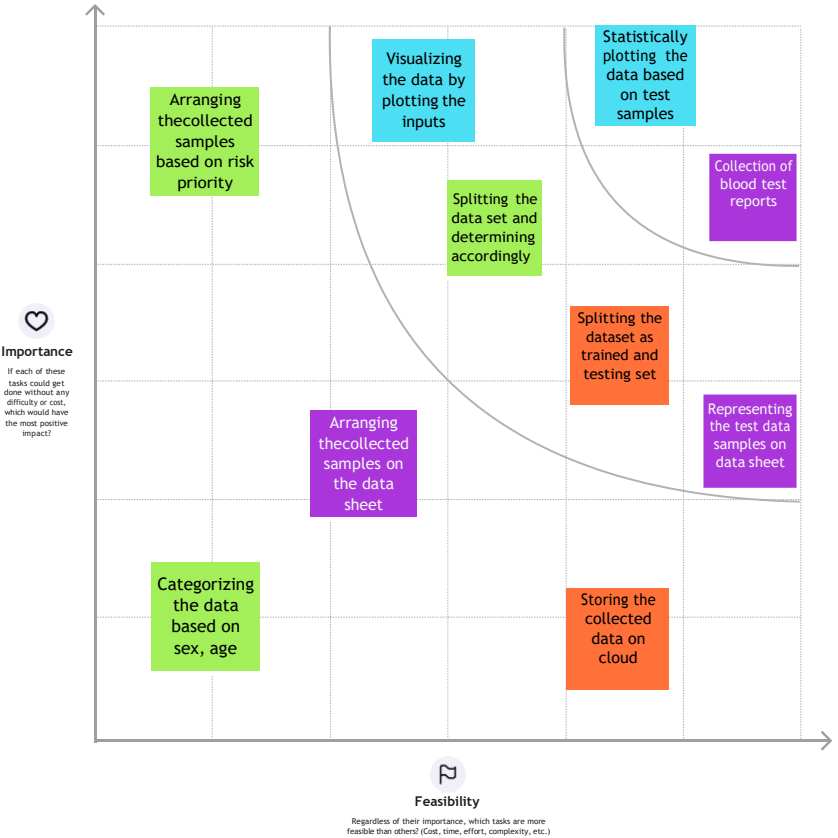

Visualizing the data by plotting the inputs
Statistically plotting the data based on test samples
Analyzing the data for individual if needed
Analyzing the test results for early level treatment
Analyzing the test results for intermediate or advanced level treatment

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

- Share the mural**
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
- Export the mural**
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

- Strategy blueprint**
Define the components of a new idea or strategy.
Open the template
- Customer experience journey map**
Understand customer needs, motivations, and obstacles for an experience.
Open the template
- Strengths, weaknesses, opportunities & threats**
Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.
